

PROFILE

Backend-focused engineer who builds systems end to end: REST APIs, data pipelines, mobile clients and IoT telemetry. Sole developer of ChainSight, an agricultural supply-chain analytics platform drawing deployment interest from Rwandan cooperatives and the Ministry of Agriculture, and CTO of HauxHunt, a property rental platform in development. Strongest in Python/Django and Java/Spring Boot, with working Go, React and Docker experience.

EXPERIENCE

Chief Technology Officer

July 2026 to Present

HauxHunt · Property rental platform for Rwanda and Nigeria · web, iOS and Android · in development

- Own backend architecture and API design covering tenant search, applications, landlord listing management, messaging, notifications and identity verification.
- Set technical direction for trust & verification, offline handling for intermittent-connectivity markets, and coordinate backend, frontend, mobile and DevOps work.

PROJECTS

ChainSight: Agricultural Supply-Chain Analytics

Solo · Full-Stack

Django REST

PostgreSQL

Redis

Celery

React

React Native

ESP32 + DHT22

- QR-traceable produce tracking across 8 role-based dashboards, with a loss-risk scoring engine fed by live GPS and cold-chain telemetry, drawing deployment interest from cooperatives and Rwanda's Ministry of Agriculture (MINAGRI).

Rides: Ride-Hailing Backend

Backend Contributor

Go

PostgreSQL + PostGIS

Redis

WebSockets

MTN MoMo / Airtel Money

- Real-time driver matching, in-app fare negotiation and live trip tracking over WebSockets for motorcycles, cabs and trucks, with mobile money payment integration.

NFC Tap-to-Pay: Android Wallet

Solo · Full-Stack

Android (Java)

NFC/HCE

Spring Boot

PostgreSQL

- Stores cards from several banks and pays in a single tap using host card emulation, backed by a Spring Boot and PostgreSQL service.

MultiVerse AI: All-in-One AI Workspace

Solo · Full-Stack

Spring Boot

Next.js

TypeScript

PostgreSQL

JWT

- Multi-model chat (ChatGPT, Claude, Gemini, Grok, DeepSeek), generative tools for text, image, audio and video, and a credit-based billing system.

EDUCATION

BSc Software Engineering

17.63 / 20

Expected Nov 2027

Adventist University of Central Africa · Kigali, Rwanda

- Capstone (Big Data Analytics): household energy prediction on 19,735 records. Best model Random Forest at R^2 0.547 and RMSE 67.3 Wh, delivered as an interactive Power BI dashboard. Python, pandas, scikit-learn.
